

STRONG BOYS

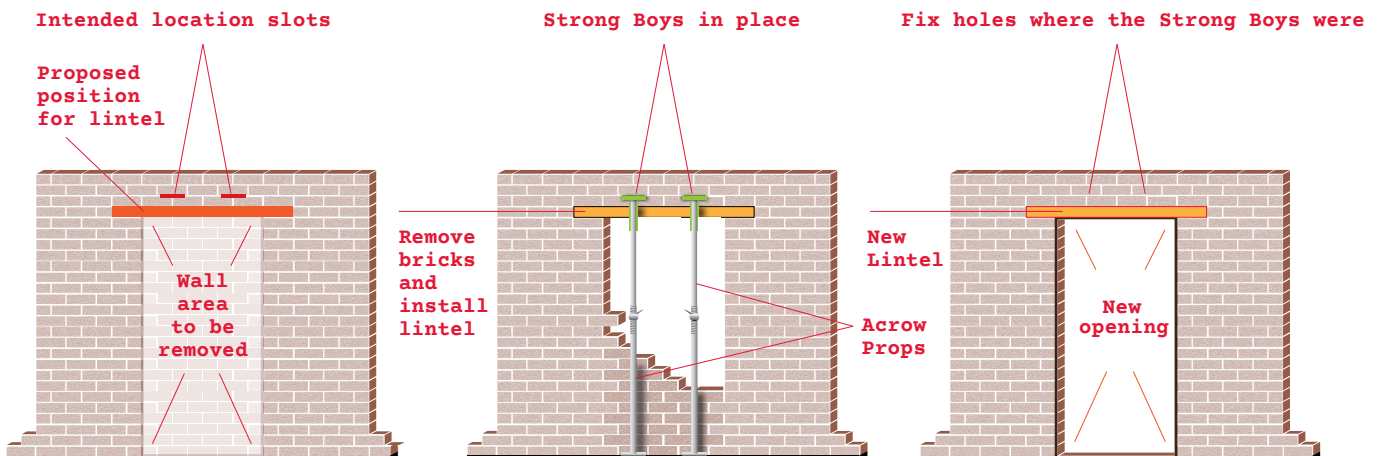

OUR STRONG BOYS WILL HELP YOU SUPPORT WALLS WHILE YOU FIT LINTELS OR BEAMS.

The Strong Boy wall support system is a robust steel acrow prop head attachment designed to support masonry walls while lintels or beams are installed temporarily.

The Strong Boy is 520mm long x 160mm wide x 245mm deep, and weighs 6.45kg. The Strong Boy has been designed to be used in conjunction with standard acrow props by securely fitting onto the end plate of all our standard acrow props.

NEW OPENING METHODOLOGY

ACROW PROPS

ACROW PROPS ARE HEIGHT-ADJUSTABLE, TEMPORARY STEEL SUPPORTS THAT ARE SUITABLE FOR VARIOUS PROPPING TECHNIQUES IN A WIDE RANGE OF CONSTRUCTION SETTINGS. THEY ARE DESIGNED AND MANUFACTURED TO FULLY SATISFY THE REQUIREMENTS OF THE AUSTRALIAN FORMWORK CODE.

Adjustable Steel Acrow Props are designed and manufactured to fully satisfy the requirements of the Australian Formwork Code. They provide excellent temporary support in many uses, and are economical, easy, and quick to erect.
