

PIPE LASER – TOPCON

PIPE LASER – TOPCON

TOPCON PIPE LASERS

Shore Hire's Pipe Lasers offer a combination of features and technology that are proven to meet the demands of contractors in the field.

Whether placed in the trench or over the top, the Topcon Pipe Laser is the industry standard because you can see the green beam anywhere, and in any weather or site conditions.

It's the most visible construction laser ever – this green beam is four times easier to find in sunlight than conventional beams.

The Pipe Laser is constructed from a rugged cast aluminium, and has a waterproof housing for tough "in the trenches" conditions.

LASER REPAIR AND CALIBRATION SERVICE

Shore Hire offers a repair and calibration service to our customers across our branches to maintain laser calibration ranges. This enables us to verify and certify that both hire fleet and customer lasers are within the manufacturer's specifications, as per AS/NZS ISO 10012:2004.

FEATURES
